We offer everything to get your artwork projects going. Manage every step of the packaging and artwork process.

Role: Lead Architect

Experience: 15+ years of total with at least 4 years of software architecture experience.

Summary:

The Lead Architect is responsible for developing creative and innovative approaches for the company's next generation of "Artwork Management" SaaS Platform. The Lead Architect will work with the team in solving technical issues on performance, scalability, and enterprise systems. The hired will also provide technical leadership for SDLC as well as transformation.

Responsibilities:

- Deliver quality software products on schedule with an eye on cost effectiveness.
- Responsible for overall transformation of the company's product platforms.
- Understand and steer our fast-growing company striving towards maintaining market leadership with innovations.
- Exhibit excellent experience in microservices to scale the product vertically and horizontally.
- Provide architectural and technical guidance to product engineering teams.
- Lead the design, development, integration, and debugging of systems and applications.
- Perform requirements analysis:
 - ✓ system/software design and analysis
 - ✓ development/software metric creation and analysis
 - ✓ system risk analysis, integration, and test metrics.
- Responsible for full life cycle of systems/applications and driving project execution.
- Enforce standard company policies and procedures that align to software development standards.
- Work closely with the leadership team to define product direction and design.
- Forecast system needs and proactively identify solutions.
- Translate product requirements into engineering specifications.

- Be responsible for project planning and management. Support, maintain, and document software functionality. Evaluate and identify new technologies for implementation.

Preferred candidates:

- Experience in .NET (ASP, C#), SQL Server, and jQuery
- Experience in containerization, micro-services, message queues, and ReactJS.
- Experience with network and server management on cloud infrastructure is a plus. Azure experience is preferred.
- Prior experience in rearchitecting & redesigning complex enterprise platforms is a great advantage.
